Board of Commissioners:
Julius Kwiatkowski, Chair
Barbara Sgroi, Vice-Chair
Dr. Florence Fruehan, Treasurer

To: Flagler County Government and municipalities within the District
From: Mark Positano, Director
Subject: Updated Public Facilities Report per F.S. 163

April 2018

Our last public facilities report is from December 2011 and requires updating every seven years. The last report discussed consolidating locations and constructing new facilities to house the District's operations once economic conditions had improved. The District has completed this project as of June 2017 and no further projects are planned.

The District now operates from 2.616 acres of leased land on the County's airport located at 210 Airport Executive DR. Structures consist of:

Office space including laboratory and conference room 4,256 sq. ft
Hangar and garage 5,640 sq. ft
Parking structure 4,800 sq. ft
Pesticide storage room 1,500 sq. ft

Our current facilities are adequate to serve the District as it exists today. Should the District need to expand to serve additional development, a series of sub-stations could be installed to better handle expanded geography.

Sincerely,

Mark Positano, Director
