

## Week of 4/22/2019 Operations Update

Still seeing some emergence of *Coquilletidia peturbans* from cat-tail swamps in the District although at a reduced rate. The stacked-bar graph below shows the total mosquitoes from all traps in the District in white. The red is the sole trap we keep on the West-side of US-1 to monitor outside the District.

Zones in yellow were sprayed by truck. Blocks in blue were treated by air (none).
