

Week of 9/13/2021 Operations Update

A slight uptick in the population of *Aedes infirmatus* this week. The bar graph below shows the total adult mosquitoes from all traps in the District for the past year (TTM).

A slight emergence of the flood-water species *Aedes infirmatus* was noticeable in the traps this week (graph below). Next week this species should be more prolific.

Zones highlighted in yellow on the map below were sprayed by truck this week.
