

Week of 5/30/2022 Operations Update

Second week of low mosquito activity. Adulticide treatments this week focused on the mosquito species *Coquilletidia perturbans*. The bar graph below shows the total adult mosquitoes from all traps in the District for the past year (TTM).

The permanent-water mosquito species *Coquilletidia perturbans* is on the wane now that it's spring emergence is at an end (Chart below).

Zones highlighted in yellow on the map below were sprayed by truck this week.
